For a perfect cut - every time.

Regular service extends the life of your Kaufmann tile cutter, reduces downtime and ensures consistently high precision.

Here's how it works:

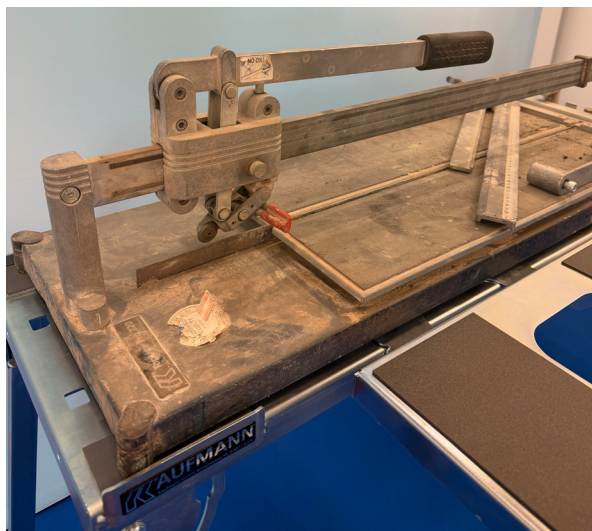

- Delivery to your local Kaufmann tile cutter dealer
- Inspection by trained personnel at the factory
- Information about estimated costs
- Repair / service / maintenance after approval
- Return to the dealer

Important Information: Always send the angle along – this is the only way the tile cutter can be accurately checked and adjusted.

The service may include, among other things:

- Replacement of the cutting wheel and spindle
- Safety pads
- Rubber overlays
- Rubber foot
- Check of the guide rail
- Check of the cutting head and ball bearing
- Check of the cutting accuracy
- Correction of oblique or curved cuts
